Subject: Application for Software Developer Position

Dear Hiring Manager,

I am writing to apply for the Software Developer position at your organization. I am currently pursuing a B.Tech in Computer Science & Business Systems at Jain Deemed-to-be University, Bangalore, and I am interested in starting my career in software development.

I have experience with C, C++, Python, JavaScript, React, HTML, CSS, SQL, and MySQL, along with knowledge of Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, and Software Engineering. I am also familiar with Git, GitHub, VS Code, FastAPI, and DBMS.

During my Web Development & Designing Internship at Oasis Infobyte, I developed responsive web pages using HTML, CSS, and JavaScript and worked with PHP and MySQL for backend functionality.

I have also worked on projects such as TrustHire, an Explainable AI Job-Fraud Detection Platform, and EcoBin, an ML-Powered Waste Classification System. These projects provided me with practical experience in AI, machine learning, web development, APIs, databases, and application development.

Additionally, I have published a patent titled "Decentral Hire: Secure Escrow for Freelance Innovation," based on blockchain technology and secure freelance transactions. I have also completed certifications in Python Programming Fundamentals by Microsoft, Data Mining by the University of Colorado Boulder, and Operating Systems by Codio.

I am a motivated learner with a strong interest in developing practical software solutions and improving my technical skills. I would appreciate the opportunity to contribute to your organization and learn from experienced professionals.

Thank you for considering my application. I look forward to the opportunity to discuss my qualifications with you.

Sincerely,

Sumit Hans
